

Google Books

Google has scanned more than 30,000,000 books of which several will likely relate to your research—even if it is just to give an historical perspective of your topic.

For this assignment, you should

1. Review the handout “Directions for Using Google Books”
<http://writing.stevenberg.info/handouts/h036.html>
2. Do a Google search to locate three books relevant to your topic. The entire content of the book—not just a snippet—should be available either on-line or to download.
3. Print out the title page of each book. On the bottom of this sheet or on the print out, provide a brief description as to how you could use the book in your research.
